

Multinationals, Governments, And International Technology Transfer

International technology transfer	The case of Russia	The case of China
Technological perspectives		
Links between technology transfer and domestic technology development, diffusion, and adaptation	Energy efficiency in industry, district-heating systems, and buildings	Energy efficiency in industry and industrial modernization
Energy efficiency, fuel switching, and renewable energy technologies	Fuel switching from oil and coal to natural gas	More-efficient coal combustion
	Electricity from wind and geothermal	Electricity and heat from wind, biomass, and solar
	Widespread technological expertise and capabilities	Influential technology policies
Agent/agenda perspectives		
Multinational corporations	Strong cost-reduction and regional-development motivations for energy efficiency	Development, trade, security, and environment motivations
Recipient-country firms	International assistance aimed at market-oriented reforms	Technological development an important motivation
National governments	Low levels of foreign direct investment	Technology imports emphasized in policies
Multilateral agencies with development goals	Multilateral bank loans	High levels of foreign direct investment
Multilateral agencies with environmental goals		Multilateral bank loans
Non-governmental organizations		
Market/transaction perspectives		
Market barriers	Joint ventures as vehicles for developing business, marketing, quality-control capabilities	Joint ventures as vehicles for developing technological capabilities
Market intermediation	Predicament of newly privatized enterprises facing market economy	Influence of enterprise form (state-owned, TVE, private-sector) on technology transfers
Capacity building for market development	Need for information, credit, economic and financial analysis skills, private-sector intermediation	Need for technical know-how, information, credit, intellectual-property protection
Technology transfer modes	Need for institutional changes (e.g. in housing and district-heating sectors)	Growing need for private-sector intermediation as state role diminishes
